

On the Precipice of Change Stardrops April 3, 2022

STARDROPS APRIL 3 – 12 2022

Mars conjoin Saturn in Aquarius April 1 – 8 peaking April 4 - 6

Mars always shows up as our drive for objective intelligent change put towards messed up situations. It is so needed now, as so many situations in the world are requiring objective intercession. On the one side, Mars is a green light signaling, “Go Now!” But Saturn delays the delivery of dramatic solutions, as it sees the end results if things go wrong. Particular agencies or assets are ready but deliberately pacing out a plan of action. The theme this week is patient movements with assessing the reality of one's plans each step of the way, in order to make the necessary changes without too much shock.

But our personal goal is to move forward this week with deliberate steps, intelligent observations, to an end goal, which ultimately brings a higher expansive freedom for you, and everyone. Walk through this week a bit more slowly, paying attention to the detail and depth one needs to be mindful of, rather than rushing through your day.

We're entering a Mars conjunction, tension is between restraint and a conservative realistic outlook on our week ahead. Make decisions based upon your actual amount of time and energy you have at your disposal, or otherwise you'll push yourself and others too hard this week.

The restraint and caution versus potential for the unexpected – these unexpected situations can come as verbal attacks or serious issues popping up, and where we can truly see this would be more global situations. Unexpected issues on the global scene will be popping up. Mars can trigger events which can very quickly get out of control.

I don't know about you, but I sense an increase of a compressed, panicky feeling in the air. New types of restrictions and ultimatums are being openly discussed - posturing are openly presented as future agendas etc.. shared with such unabashed authority, nothing is being held back now. Mars conjoin Saturn brings out into the open, issues in all areas globally, that press upon us to make decisions as to how we should prepare.

The escalating situation could be just about anything now – especially war, economy, purchasing power and just basic living. As more truths emerge, each event has us re-thinking our personal place in the

world. Some of these issues will be unfortunately, carrying the negatives, the Anti Aquarian issues, anything anti- intelligent, anti-freedom of one's rights, Alienation, hatred, electronic technological threats, blackouts, electricity and energy conflicts, breakdown of rights, anti- liberty with one's own stuff, money, currency, insane speculations regarding food availability, these issues are pushing certain large numbers of influencers to take a stand like never before. Extreme opposition will be taken to stop oppressive outcomes. This week begins yet another level of realization, some form of intervention is necessary.

This is all beginning to pop this week. Our posture to take? Cool, calm deliberate organization, order, professional movement forward, financial practicality, preparedness and common sense.

Venus, March 31-April 1, then Mars, April 6 – 7 squares the Nodes

The need now for balance, self control, detachment, and sound money decisions.

This cycle is about money, economy, and what we value. It involves social values, cultural values, and the squares show us, a huge conflict of values and society positions is escalating between some organization who thinks they control the world, and, us. I'm so baffled. Are you?

Venus and Mars forces our attention upon ownership of our things, our Aquarian freedom, and how to maintain possession of the things we know which continue to provide individuality and independence. The square from Venus then Mars to the Nodes is an announcement which rubs people the wrong way, regarding these issues, but it's a square, which means the public is stressed one way or another over certain actions.

Venus contains the love and emotional attachments to Aquarian truth and freedoms, Mars in Aquarius is that desire, the intense focus and drive, for liberation, transparency, and opportunity to transform systems and situations which are defunct, dysfunctional. Wouldn't it be a horrible moment if Mars/Venus in the truthful sign Aquarius, suddenly quickened our smart brain cells to finally recognize some really crazy people are running the world? What would we do?

When squares happen, a conflict occurs over these issues quickly, and they begin heating up intensely. Arguments, exposures, accusations and calling out agencies, individuals who are walking a path that the public (nodes) in general do not agree upon. That is what is escalating now.

The bigger picture, aside from this weeks' quick Mars escalation, is our astrological umbrella in 2022, the big Pluto re-set revolution transit in the 1776 chart, and so even smaller astro cycles such as the Venus/Mars square, will be amplified because we are under that umbrella of a much more intense revolutionary cycle.

We can't forget this larger astrology cycle which began building a few years back, and kicked in hard exactly February 22, 2022. Who knows how long this new cycle will play out? Technically, it is over on December 29, 2022, but was it really over when it was technically over the last time we went through this, 246 years ago? This Pluto larger transit has taken everything to a much more dramatic level on the earth. So even though Mars moves quickly, in these positions, it could be volatile now.

Mars moving towards a conjunction to the U.S. Conceptual Moon in Aquarius, oppose the U.S. Black Moon triggering a strong impetus for independence from oppressive entities. A lashback against further attempts of control.

April 9 – 13, 2022

This is a quick cycle, but a potent one. Any one of these fast moving Mars transits now, is like adding fuel to the fire. The Mars conjoins Saturn exact April 3,4,5 as we described in the previous paragraph and begins to move rapidly towards the U.S. Moon in Aquarius in the 3rd house of the media, news, independent journalism and shocking information. This cycle instigates a huge step up of challenging disinformation or mistakes, neglect and missed facts, while intensifies networking information which has emerged everywhere regarding more shocking issues even now being released. This is again, to bring Aquarian objectivity in order to inform the public. It instigates intense facts truths brought out to humanity via 3rd house pathways.

The nature of this Mars in Aquarius always contains the potential for chaos and explosive events, the intent to learn, be informed in order to change situations. It is a step up of controversial issues and literally triggers volatile acts.

“I AM the cooling calming down Presence transmuting all volatile and irrational conditions within my own life and the world, now, with that peace commanding Presence of Divine Love.”

Jupiter in Pisces conjoin Neptune in Pisces, sextile Node in Taurus and beginning to sextile Pluto in Capricorn.

April 1 – May 3, exact: April 5- 13

I know for the past few weeks, we've been looking forward to the softer healing energy of this astrological cycle, but it also begins a process where certain areas of leadership, committees or organizations are challenging and then replacing certain people who are in positions of power, changing out situations which have been at the root of social depression, ineptness, manipulation and the massive secrecy behind all the destructivity. This is because of the compulsivity nature of this conjunction towards idealism, desire for solutions towards any further suffering, misinformation, ineptness in any area and accepting the inevitable need for change.

The lower nature of Neptune however, might continue to play out and that would look like a continual barrage of lies, lack of accountability and the withholding information, madness of mixed messages, denials, and layers of undermining behavior. Also, deluded leaders assuming everyone will go along with any plan they have for humanity and accept it and like it.

Not during a Pluto revolution. Yet, because Nodes are symbolic for the population in general, and

Neptune/Jupiter is positively in sextile to the Node, this brings a sort of grace, or intervention, so we could see some good come out of this time period in the form of firm change, as if humanity as a whole has compassion for mentally sick global leaders who now need to be handled as psychiatric patients. Gently they are challenged, replaced and put where they belong, no longer taking any of their declarations seriously. A huge paradigm shift has occurred.

The past **Neptune/Node cycle, January 2021** was symbolic for a year of unfortunate confusion, taking deluded people too seriously, surrendering to their expertise...this cycle has been moving slowly *towards the next favorable Neptune/Node cycle on January 2025, Neptune conjoin the North Node.*

This cycle now, is very helpful for breakthroughs for most of us, helping us to accomplish important tasks, trusting our own intuition and logical conclusions and reaching deeper levels of awareness and spiritual understanding. It provides a depth of discovery, challenging all things which don't match up. A greater understanding is coming upon us all in general.

March/April Jupiter/Node/Neptune will reveal people talking about very clearly defined standards, ideals, globally and how to proceed. Neptunes' highest energy is the gift of ideal aspirations. It can answer many many questions for the world, if the world will hear, and provide solutions. Many will adopt a more realistic facing of facts and accepting the inevitable action which must be taken in order to regain some sense of sanity back into the world.

Newly uncovered information is coming. No one can deny these things which are being uncovered or shove it under the carpet – in otherwords, we can not unsee what has now been seen and learned. The world is now and forever changed.

(Jupiter conjoins Neptune exact on April 12, Jupiter sextiles the North Node exact on April 13, and Neptune sextiles the Node exact on April 14.)

We can expect to feel and witness to an increase of heightened emotions, vulnerable state and increase of high aspirations leading towards some sort of breakthrough to take place now, from April 1 – 20, reaching an intense crescendo April 11 – 15th, 2022.

This will be a powerful time where we sense we're waking up from a long sleep. We look around at our lives, our environment and slow down to absorb every detail. Everything has become like water, one issue merging into another, it's all liquid like and dispersed, flowing one thing into another, undefinable boundaries, people's statements, positions, actions, threats, declarations, commands, mandates, un-mandates, what is going on? Stay clear with yourself and your own purpose and path now.

A clarity is happening if you focus, in the midst of this ocean of loud blustering nonsense...and we all are waking up from a blurry sleepfulness which is an amazing thing. No matter how awake you already are, you are throwing off more and more layers of fog and programming as you move through these months ahead.

April 7 – 8 Mercury in Aries sextiles Mars and Saturn

On top of all the intensity of revelations, revolutions, and challenging confrontations, comes Mercury the planet of communication, bringing potential agreements, meetings and negotiations with positive arrangements and outcomes.

April 10 Mercury at 28* Aries square Pluto at 28* Capricorn

One day of not so good discussion, black and white decisions or commands, negative punitive

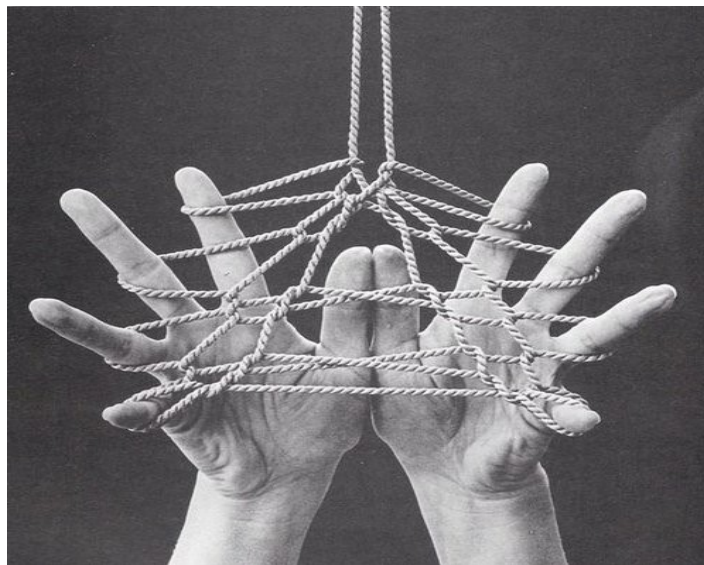

comments or declarations. Not the best day for contracts, agreements.

Mercury moves into Taurus April 10th to 29th

Financial goals, building, construction, practical lifestyle changes, preparations, business focus and our mental state will be concentrating upon material tasks, physical and very practical down to earth projects. It is a great time to do anything constructive, gardening, building, repairing, body work, upgrading house, car, house repairs. This time period motivates organizing your financial world also, pushing us to plan a bit more specifically for greater preparedness.

July 11 will be the exact peak of the 2nd Pluto conjoin the U.S. Pluto, (1st cycle February 22 2022)

Problematic issues are increasing on every front regarding money. It is a strong cycle of Pluto (death and rebirth of issues in the world) continuing with conflicts...financial, economic, banking, confrontation and challenges over currencies and world control over humanities' money, how it will play out and the impact higher up decisions will have on humanity. This cycle exposes the individual being under more control because this Pluto is in the 2nd house, it's all about human worth, human value, our stuff, our net worth, our rights to own our own lives, claim ownership over ourselves, our money, purchases, what we want and ultimate own our own genetics. If substances put into our bodies have potential for altering genes, and it is patented, then who owns our bodies? Dr. Joseph Farrell spoke of these times back in 2011, who will then own humans if their genes are patented? You might have heard of me bringing this up in previous articles way way back, and now it has become a reality. So this is the revolutionary core issues of this Pluto 1776 return really. So in addition to this incredible time we are living in, being about the transformation of our oppression towards more freedom, the disgrace of how our money has not been handled properly, the revelation coming soon, that mankind have been compromised...and now will need to fight for their humanity rights.

The first sign of this began **February 22, 2022**, and began escalating up through March/April 2022. The 2nd peak is July, 2022. They are escalating crescendos of experiences and increased truth and awareness of what has really been going on in the Earth.

Third peak will be December 28, 2022. Each time it peaks, another level or layer is either pushed upon the world by increased orders, manipulations and mandates, and/or confronted and challenged by more and more of humanity that are realizing, this is literally, insane.

This is just the beginning of the opening of the door to all issues which will be challenged and could last for years. Remember, this is a once in 245 year cycle, and not concentrated in America, but a global problem. The warmongering community will continue to attempt to manipulate agenda, cause a world war and mess with propaganda in order to continue with chaos and desperation.

Our Goal? Pluto in Capricorns' last years, now through 2023, would be to increase our own Capricorn authority and power, our spiritual, personal, professional purposes, constructing and implementing new brilliant systems, bringing down into greater clarity our own blueprints, and truly owning them, embracing what we are here for. Sometimes it's not to save the whole entire world, but the quality of life, the light and fire which lives so brightly in so many, to secure a segment, a section of the earth's highest potential, but not all. It might not be for all, and we need to prepare for that.

May is going to be a crazy month.

Uranus inconjunct U.S. 1776 Saturn ruling the 10th house government and power

Changes with the President of the U. S.

August 2021, returning now up to May 5 in an exact peak, shifts into a more escalated form of targeted, specific chaos from May 5 on, peaks again all October 2022, then moves out of the inconjunct after October 2022

A Great Perception Shift Everywhere is Occurring. Circumstances in real time, with real live authoritative positions of power, are going to shift.

Government leadership is going through a terribly inconvenient series of one confrontation after another, a real shake down and massive shift of power, is about to happen with this cycle.

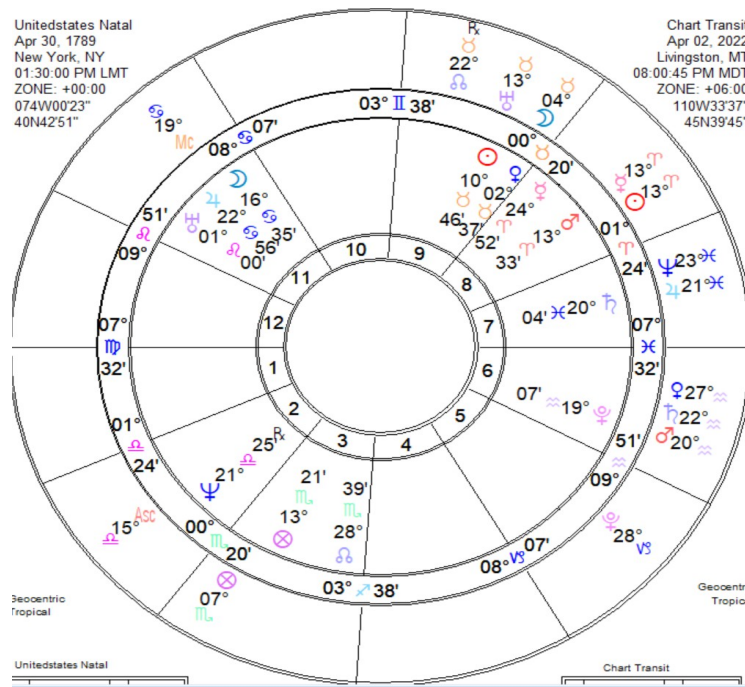

Threats of exposure with certain individuals; corruption, will go on and not many are exempt from this period of calling people out, scrambling for keeping things hidden – anxiety levels are at an all time high, desperate declarations, crazy statements made in people's defense, people leaving, retiring will happen, policies attempting to be enforced, bills signed, policies changing, etc...this is very messy time for U.S. Government in relation to rest of the world and especially those in higher positions who are in decision making positions compromised from past manipulations now being unveiled, as Saturn sits in the 10th house of governmental power and public reputation and status. This is where it is all happening.

This began all last August 2021, returns now and crescendos on May 5 in an exact peak, but then really shifts into a worse chaos from May 5 on, peaks again all October 2022, then moves out of the inconjunct after October 2022.

Uranus inconjunct U.S. Saturn, leaves people in bewilderment as to what just happened to our order and sanity in DC and everywhere. A shift of power is occurring. Another strange clue, natal Uranus is natal in the U.S. 6th house of the military, so the Transit of Uranus inconjunct the Saturn is pulling on that Military, and/or public servant people will be participating in this weird theme, adding yet another layer to the discombobulated actions involving our military. Politicians are very much a part of this crazy changing cycle, home and abroad – Uranus exposes videos, conversations, contracts and arrangements. Treason is discussed. These revelations changes out circumstances in the most dramatic ways, it shifts, makes dramatic adjustments, incongruencies of statements, facts,

Backpedaling, information versus orders, they are not matching up. What is going on? Someone mysteriously disappears. It's like one world is disintegrating as another world, (and persons' involved in authority power roles) is emerging and put into position. What a weird cycle to interpret and observe. I personally can't wait to see how this one plays out.

The Saturn inconjunct the natal 1789 U.S. Jupiter

Experts and credible informers coming from outside situations, possibly even in other countries, experts, first hand witnesses are disclosing alliances, agreements and arrangements between parties, these situations, bypass normal channels, informing U.S. Population info in order to have broader sense of truth. The Jupiter in Cancer is always the good karma and generous nature of the U.S. people, and Cancer rules security, safety, everything one needs to survive – it is also in 11th house, humanitarian. A Saturn inconjunct says there is a conflict here. We can no longer count on someone's role, position for our Cancer Security and well being...is it economic? Is it national security vulnerabilities? Is it food/energy/economic shifts which are pushing the people to a limit?

Normally when we receive an inconjunct from Saturn in our own charts for that year, we are learning the hard way, whom not to trust and depend upon anymore, as they fail us over and over again by their out of touch world they are living in at that time.

America is going through this, where others are being prioritized outside of U.S. over the U.S. population's needs at this time of 2022.

This will definitely lead the people into one more layer of shifts and change away from counting on those in powers' judgment, and begin taking back upon themselves what they must do to make the necessary adjustments for the people's best interest.

This is a sign of an exasperation within the population of the country, as Jupiter is in Cancer in the 11th, the community of humanity, population's sense of security – and Jupiter rules Sag, which we find on the 4th house of the country's entire security base –national security, protection of borders, boundaries, real estate, migration of people, their homes, food, housing, safety.

This inconjunct, always frustrates because of some form of huge disappointment in whoever the population thought they could count on for common sense, moral guidance and professional experience – the test of a Saturn inconjunct is to wake up and realize there is no security with some base foundational proxy or puppet person, or agency, lacking in moral conscience and vision to provide security during these dates. One has no other choice but choose another avenue of creating security.

Here are the dates of the serious disruption and shift of the people's awareness:

April 4 – 15, 2022

July 20 – August 5, peaking August 31, 2022;

December 28 – January 10, peak on January 5 2023

The last peak, is always the most obviously disappointing moment of the entire lesson of the people who they can no longer count on within the core of leadership community of the country, putting the entire country into a state of high risk. The natal Saturn is in the 7th house of middle person, negotiator, the mediator, or authority in power supposedly representing the will and best interest of the people. These powers are in the position of building outside relationships, negotiating agreements – so this natal Saturn's theme within the U.S. Astrology chart, is influencing the Transit of Saturn' disruption to the people. Saturn's natal position is always in the 7th house, testing the country's mastery in either collaborating fairly with others, or being firm in one's decisions for what's best for the country.

Transiting Uranus in Taurus in the U.S. Natal 1789 9th house sextile U.S. Moon in Cancer in the 11th, ruling the 11th house (Cancer on the 11th house cusp)

June 5, 2022 – Nov 17, 2022 – March 27, 2023

This time period can bring a rising up of all forms of technology, healing modalities, medicines, solutions, economic answers, new programs and professionals who have humanitarian motivations, desiring to unite people with truth, change, and raise them up to a higher unity worldwide for change and freedom. It is the discussion of having some form of template of Freedom Document be adopted worldwide by the people.

Saturn conjoin the U.S. Natal Pluto in the 6th house

March 3, September 27, November 16, 2022

Serious financial realities addressed

Neptune trine U.S. 1776 Mercury in Cancer in the 8th house

One of the challenges within the U.S. Charts, is discerning between deep state showing up in the astrology versus the good people who have ability to move the country in positive directions.

We can also see high percentages of population trending towards a particular theme.

One of these trending themes which is good, is the Neptune in Pisces trine Mercury in cancer.

Dates: April 18, 2022;

Sept 10, 2022

February 18, 2023 - More will be written about this cycle later. For now, it could indicate breakthroughs with presenting ideal and fair solutions to all 8th house data of finance. 8th house is about financial relationship with the world, the data, the details discussed and agreed upon for economic structure and each country's agreed upon value/worth of currency set, how to move forward with its impact on prices, exchange, cooperation and ease of movement of money. A Neptune trine is there to heal, openly discuss and heal issues. Would it also be however, a Neptunian union of all countries' money under one sea of control? We'll have to see how this one evolves throughout the year.

Neptune begins to sextile the U.S. Pluto in the 2nd house

The 2nd house is U.S. And Global finance, banking, currency, and all things regarding ownership of our stuff.

This is beginning June 9, 2023 – up through January 15, 2025. This cycle is quite long where there seems to be a on the higher end, ingenious solutions and programs possibly presented regarding economic change. On the negative side (which sextiles do not normally display, but during these times, let's pay attention) there might be programs rolled out which are coming across has higher economic solutions to the world debt, etc...yet they are merging everyone into a monitored blending of no one owning anything.

Somehow there are also media, internet, discussions, interviews and massive analysis of options of financial control, central economy versus alternative options, which seem to be moving towards constitutional ideals agreed upon, and a grace period maybe like buying time, in order to quickly establish these new positive systems in place. Some cooperation allowed for population to have a type of financial exchange they prefer. We'll see..I'm skeptical. This is about money, our means of exchange in order to pay bills, buy stuff, and in it's potentially positive sextile aspect, interfacing with also global positive ideas.

Saturn conjoin the U.S. 1776 Chart's Moon in Aquarius

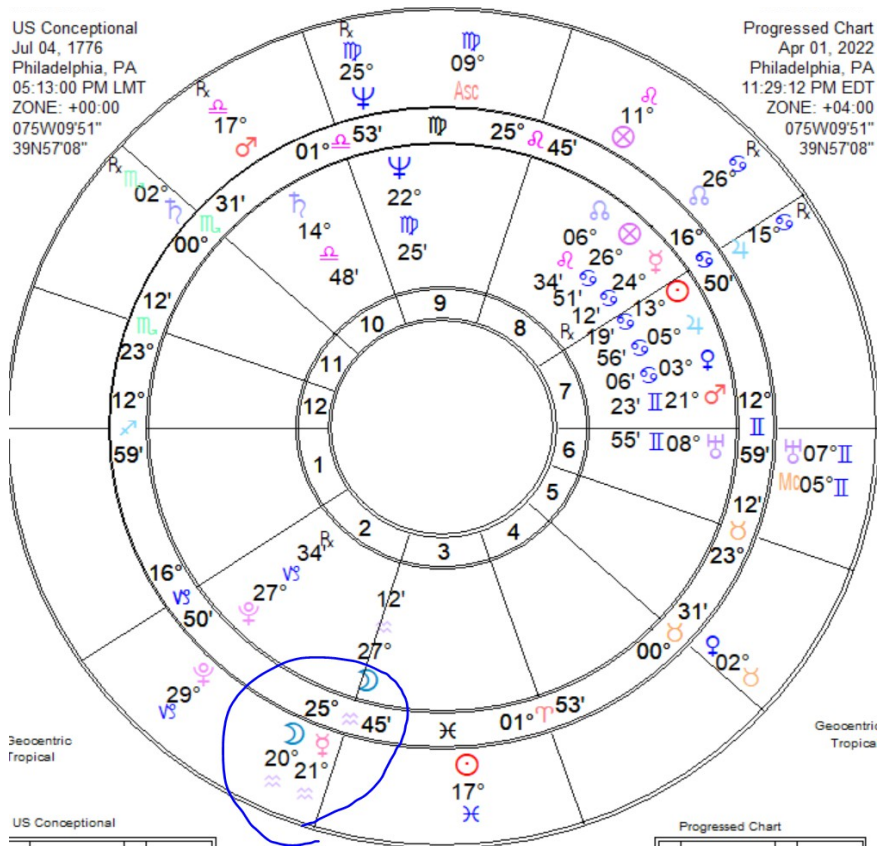

The news sources, our media, journalism is getting hit hard with this cycle. It is a serious cycle of intense major pressure of accountability and a demanding for change, pressure for pure transparency. There is no other way as Saturn is now like a big boot on top of the news. Especially during a Pluto return.

May/June 2022 begins, continues up to the final legal and moral accountability of news outlets by

February 12, 2023. Several reasons for this – authority legal confrontations and exposure of certain issues are forcing info out into the open – Saturn is putting such pressure on the accountability issue, there is no where to hide.. and loss of revenue occurring, as other Aquarian forms of journalism replaces past news outlets. This is going to occur rapidly this year coming to a head exact on February 12, 2023.

Prog Moon conjoin natal Moon, and Transiting Saturn

August 1 – Sept 26, 2022

A period of news outlets, media change, confessions, exposures and transparency within journalism and reporting truth. Simply another validation, that 3rd house news reporting, is a highlighted issue for evaluation, and the continual expansion of Aquarian freedom of information, the right for people to know certain facts for their own personal well-being, is up, front and center.

imagine all these planetary cycles playing out in our lives all in one squished period of time ? I find it absolutely incredible, and we must give ourselves credit for surviving the most epic time in Earth's history. I know I've said it before, but we're pretty great!

See you next week!
