

# The New Moon in Aquarius January 21, 2023

Stardrops January 22-28 2023

**Jan 22, 2023 Mercury trine Node at 9° Taurus**

A nice day of harmony in regards to our outlook on our jobs, projects we're planning, our money, and especially harmony with others in our lives.

## New Moon at 1\* Aquarius Jan 21 - Feb 4, 2023

Each New Moon is an opportunity to set our course for accomplishing something significant. This inspiration builds for two weeks up to the next full moon.

During this New Moon in Aquarius, it is the start of a purge to eliminate subconscious and unconscious invasive programs which may have been inserted into our lives in this and past lives. These inserts entered through so many unusual circumstances, such as taking part in extremely damaging interactions with others, especially over a prolonged period of time. They may have been projected into us, even our soul pattern, by media, music, movies or even by technology we couldn't even detect. We're talking about manipulations put upon humanity, taking us away from our natural perfection.

This New Moon is the beginning of realizing, "I need a purge to change destructive patterns which sabotage my divine self, transform mental and emotional triggers and negative reactions and return to my true nature..." and whatever else you're tired of that seems to go on inside of yourself for too many years. It is a new awareness of something foreign which has manipulated our behaviors against our true patterns of our souls real identity matched with our divine DNA. It's a natural state which has been manipulated. We want to purge this artificial manipulation which has occurred. The New Moon in Aquarius, leading up to the Pluto entering Aquarius, rescues our consciousness from the grids of slavery..it is the impetus and awareness of our need to change a few months before the Epic Pluto transit moves out of Capricorn and enters Aquarius March 23, 2023 up to 2043. This is a precursor to that event coming up.

This new cycle inspires us to embrace a transformational growth, but not in your usual everyday way, but presents a challenge to go beyond typical ways of human habit changes. The cycle is opening doors to an understanding of being programmed, remembering our cosmic purpose for this transformation to occur.

**The power is within the belief it CAN BE CHANGED.**

By overriding old negative patterns in our every day routines, and committing to affirmation, strong spirit/mind guidance to align ourselves to a higher future goal, and engaging in this commitment every single day, can push us beyond our average human limitations. This New Moon commitment in Aquarius, which always challenges us to transform our old self into something better, will push through walls of limitations, present interferences with our life, and push us way above our stuckness each day to a higher happiness and fulfillment of what we would rather be experiencing.

*We have had our true origin and history erased, so we walk in the dark, accepting social projections year after year of what is suppose to appear as normal when it is actually living at the lowest common denominator level of existence. Each place you find yourself living and working within, could use a bit of change, not excepting the mediocre in any way.*

The New Moon in Aquarius at 1\* sextiles Jupiter at 4\* Aries and trines Mars at 8\* Gemini, gives us a great start of mental clarity for truly cutting through on any mental work, reading, studying, writing, communications and experiencing much connection with our loved ones. Do not allow anything to run your mind any longer- this is part of the new conviction under the New Moon power leading up to the Pluto in Aquarius on March 23 2023.

It inspires the desire to achieve idealistic outcomes in the next few weeks to be able to smoothly think clearly, get our everyday tasks taking care of, and implement change in our life. We're talking about streamlining our life, our work, schedules bills, budget, connections with key people which are important to stay in touch with. This will all be increasing along with the deeper insight into what is inside us which needs change and motivation to achieve specific goals against some challenging odds.

The mind is becoming more masterful at looking at truth, facts and transparency with any given issue right now for the next few weeks. But mostly it increases the trust that we can make it happen.

It can inspire launching a new project. It inspires freedom and liberation.

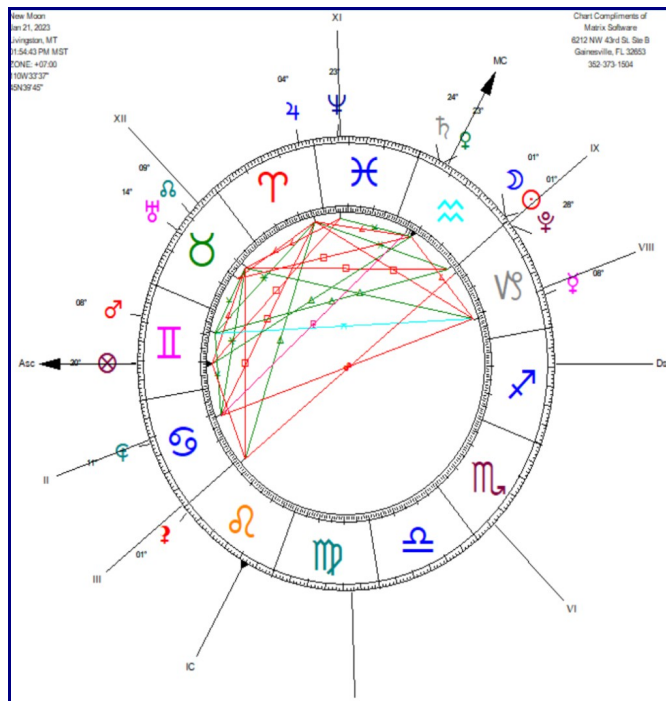

Discussions are progressing in regards to free energy, advanced technologies but respecting human organic ways of life.

It's the start of gaining control over AI's rapid infiltration into every way of life, creating boundaries as to how much invasiveness is allowed into our lives. The conjunction to Pluto at 28° Capricorn tends to make it bigger in significance and have a longer and greater ability to cut through and overcome.

This New Moon opposes the Black Moon at 1° Leo causing a split between challenges a new future regime we desire to set in motion each day, determined to overcome predictable negative challenges versus the Leo self satisfaction, personal leisure, relaxation and indulgences. The key would be jotting down where you're at right now looking ahead, listing your concerns, and building short Affirmation sentences which use positive statements for overcoming problems. Using this affirmation outloud each day you have built for yourself challenges to the Black Moon's complacency.

## **AFFIRMATION**

**"I Am defeating and purging all that is not the true me. I AM welcoming tremendous purging of all disruptions within my unconscious, subconscious, conscious and super conscious. All contamination at every level, physical to energetic patterns are now purged. I replace these implants, toxins and disruptive energies with divine perfection and healing. I AM Whole in every level of my body, mind and soul, realizing this is the end of my old existence, the old world I use to walk. I now have newness in every area which is the new day of great freedom from limitations, great happiness and hopeful futures revealed more and more each day!"**

New Moon January 21 2023 active up to February 5, 2023

### Jan 21-23 Venus conjoin Saturn at 24\* Aquarius

A bit of strict discipline required on these days in order to show up for others, being our best self. It might be a low energy cycle, so make sure diet is super pure and strict with minimum carbs and sugars, more proteins and veggies, nuts and lots of water. Contemplating our new regime, disciplining ourselves and embarking upon a new cycle of what kind of commitment it's going to take as we engage in our new moon challenge. These days could be looked at as a marriage we make with the Aquarian love for all things progressive, true, transparent and intensely creative period of time we are now entering into. It's the commitment to creative change versus stagnation of the old self.

### Jan 23 - March 11 Chiron conjoin Jupiter at 4 - 14\* Aries

A period of time examining our old wounds and with Jupiter's philosophical energies, we take the Aries initiative to gain control through some sort of action taken to change the wounds to complete healing.

### Jan 24 Sun sextile Jupiter at 4\* Aries

A happy day of collaboration with others, positive get together, meetings, yet with a joyous, philosophical background of discussion. It's good for publications, uploading materials, marketing, planning a get away or attending a nice seminar. It opens up our minds and expands our awareness of what is possible.

### Full Moon Feb 5 at 16\* Leo/Aquarius

By the time we reach Feb 5, in two weeks we can feel very much changed. By engaging in our transformational commitment by giving our positive affirmations with our mental/heart conviction to reach these potentials no matter what, we will have begun to put into place a new pattern to help us get through the Months of February/March 2023.

Let's have trust in this process so by the time we reach the full moon moment on February 5, 2023 where fruition occurs, we can notice the definite change and success. We can look at this experiment as a sort of precursor to the upcoming Pluto moving into Aquarius March 23 when the longer cycle of personal

and humanity transformations truly start. We are entering an exciting time of extraordinary change for the highest good for all.

**Jan 25 Mercury at 11° Capricorn oppose Hades at 11° Cancer**

A day of challenges towards darker situations. Our job is to stick to the powerful boundaries we have and not succumb to others' negative behaviors.

**Jan 28 Sun at 8° Aquarius square Nodes at 8° Taurus/Scorpio**

A day where some situations just seem off. Where you are is in conflict with a social interaction and leaves you a bit stressed. Be the example during this day, and take the higher ground!
