

March 5, 2023 STARDROPS

Hello Everyone! March is quite active as we enter several new themes. Let's jump right in!

Mars Leaving Gemini retro/direct since August 21, 2022

Since August 21, 2022 our logical analytical minds have been highly motivated to charge right into productive progress in ways we have not been able to achieve before. For some it was the onset of crisis management with issues either at work or personal, which required overtime to correct mistakes, accidents or upsetting networking, communications, tech or personal unexpected issues.

Now we are in the last few weeks of this high energy cycle for whatever it has meant for you for the past five months.

Mars is moving into Cancer on March 25, 2023 to May 20, 2023 which will shift our drive to domestic, home, family, emotions or at least security and safety issues. Our motivation will be food, money, personal needs and closeness. The sense of urgency to overcome and clear away unresolved procrastinating will be wrapped up for the most part – now we're moving into our personal feelings about things. Reflecting and attempting to address our most private needs, getting our needs met and creating a safe haven in some way. All issues regarding our feelings and restoring safety and closeness will be emphasized.

Saturn moves into Pisces on March 7, 2023 through May 24, 2025.

Saturn temporarily moves into Aries May 25 2025 until Sept 20, 2025.

It moves back into Pisces on Sept 21, 2025 to Feb 13, 2026

Saturn will then move into Aries on Feb 14, 2026 for two and a half years.

Saturn is our planet which provides themes of responsibility to master the qualities of the sign it is in. So while Saturn is in Pisces, here is a list of possible issues we'll be challenged to master, overcome or adapt to in our every day lives.

- **Embracing higher idealistic goals and aspirations, how we see things should be in our lives, but**

are not yet realized. It is the desire to reach these goals, and have the faith and trust somehow they can be achieved.

- Any issues with our personal suffering, our condition, our karmic situation which appears too much, can weaken our spirits and cause us to wander into that victim place with little sign of relief. Antidotes definitely needed here ...
- Increase of spiritual aspirations – seeking more meditation, communion, linking our souls to our Higher Presence and the real Higher Divine Teachers in the highest dimensions, only wanting the real deal and surrendering lesser gods who have not reached that pure place of divinity. Realizing this higher realm is where we receive the most permanent help and tie to the Etheric Plane. Increasing our spirituality and asking for intercession from the highest sources.
- Motivated to move into greater charity, hospice work, medical support and empathy for those who are unfortunate in any way.
- The motivation to study psychology, face reality regarding mental and emotional disregulation within ourselves or those we are close to – gaining a greater clarity of the situation we can heal and also set better boundaries for ourselves, or for others who have these issues without feeling shamed or negative in any situation. Getting our own bodies, health, diet, medical and psychological needs in balance.
- Desiring heaven, desiring a reprieve, an escape, wanting respite from over work, overwhelm over service and overly sacrificing which feels like a drain, being used, taken advantage of and no end in site to the amount of giving asked of us.
- Disappointments in the world, our job, our communities or organizations we have been tied to Disappointments in human limitations, density, lack or situations where it appears to lack any change, solutions, evolving or acceleration.
- Depression, hopelessness, giving up, apathy and frozen paralyzing states with challenging attitudes like, “what’s the point anymore, I don’t care...”
- Facing the difficult truth regarding a world of leaders who are engaged in perpetuating lies, deception, lack of authenticity or conscience in their dealings. Pisces ruled by Neptune, brings these truths to the surface to be challenged and strategically replaced by the Ideal of Pisces which is the Christ Standard, (an ideal plumb line symbolically for earth) in order to acknowledge and reach the higher goals for mankind to adhere to as we enter the Aquarian Age.

I know this is quite a list, I could add more but...it pretty much exposes for two and a half years the dysfunctions which must be addressed, personally and globally. What’s still left in our psychology patterns we can turn around or handle better? This is the main theme I believe will be up for two and a half years.

Saturn in Pisces is an irritating position for Saturn.

It has zero tolerance for things which are not in alignment with that higher ideal and expectations. It wants things brought out to be addressed, confessed or replaced. In a more emotionally charged manner, it is similar to Virgo’s energy for the desire of things to be perfect everywhere. But along with this intolerance can come apathy and hopelessness that it’s too hard to change anything.

The difference is Pisces focuses upon all the unnecessary mistakes, the ideals as to how something should be, suffering and dysfunction which should be so obvious to everyone which is incredibly wasteful and backwards, and why can't anyone see it and stop it, where as Virgo focuses upon the details which are in error, the effort it will take to clean it up and fix it, the process of fixing things, its functionality process. It is more concentrated upon the editing a project and then correcting, or creating perfection so everything does run efficiently.

The previous cycle of Saturn in Aquarius (March 2020 to the present) dealt with Alchemy, truth shared within communities and transparency, forming bonds and networks, groups and alliances which felt they had common groups to create a sort of revolution of ideas, a sense of purpose to transform things, connect dots and be basically avant- guard and brilliant. Combining this with the acts of confidence and love to agree how to improve on our existing world you have the beginning of an open revolution towards the light.

Personal and global. It was more of a discussion and awareness of how to improve with what we could work with. A networking of agreed upon revelations, networking of ideas and truths. Building a community of like mindedness.

Saturn in Pisces is the last sign of the zodiac and so it is the last straw, it is water, but I see it as an incredible force of frustration, intolerance and extreme action taken to blow up all corruptions and disgraces with an action taken to overturn it all.

It is also a severe karmic reckoning, like the end of the line of opportunity for those who had time to change and turn, in the previous cycle from March 2020 – March 6 2023. The waking up of those who are unconscious, one way or another.

Addressing medical and economic deceptions and disgraceful agendas, confronting vehemently all things dysfunctional and backwards, inexcusable incompetence among leadership.

Addressing our own tolerance for not being our best. Be careful with this new cycle, as intolerance of ourselves, and others, can be our downfall. Find the balance always with love and empathy. Pisces is also compassion, love and finding alternative ways to release frustrations and disappointments, working things out with tolerance and understanding. Sacrifices might need to be made much more in our personal lives than normal. Forgiving and bending, as Pisces is ruled by that Higher Divine Love planet, Neptune.

Next New Cycle Pluto In Aquarius March 23, 2023 – 2044.

This amazing cycle is for ultimate reform, a rising up of those who have been inline with truth, freedom, honor of respecting each persons' right for free will and individuality, yet forever acknowledging the power of Aquarius to become the divine man or woman...the right to free will without harm towards another. It is guided by morals. Practicing love for one another,

This cycle is the greatest symbolic planetary symbol of truly entering into the energy of the Aquarian age, even though I believe we have already been moving into it for the past twenty some years. So hold on to your nervous system, because this shift will be felt as a massive challenge for acceleration personal acceleration with almost a sense of urgency to become the best one can be....a list of some examples as to how we will accelerate are below:

- **Acceleration of mental faculties and casting out all lifestyles, substances and densities which inhibit our best possible potential.**
- **An acceleration of medical, herbal, natural and pharmaceutical remedies to move our society into greater freedom from limitations and illness which have been withheld.**
- **The truth about our worlds' history with the eruption of megalithic sites dated far before 4,000 – 6,000 years ago.....finding truth of advanced technologies with several planetary resets partially wiping out these civilizations. Their causes, catastrophes from polar shifts, asteroids, Paul La Violette's theories of super charged releases coming from the Sagittarius galactic center or have they been resets from Cosmic Wars and advanced weapons? Why have these occurred, and can we prevent a future wipe out, with our new awareness and technologies if we merit the grace to overcome these potential disasters?**
- **The new scientific breakthroughs with time/space, energy, alchemy, manifesting and what is reality anyway?**

- **Our own personal desires to live at a higher, freer and more liberating life. Changes for the better with our finances, economy and freedom for our privacy and individual rights involving financial exchange for goods. Options for crypto economy without being controlled.**
- **Space, flight, travel, transportation, communications and all devices and equipment necessary to navigate through the world is progressing, releasing safer modes of tech with greater efficiency, safer and without physical compromises.**
- **A sense of greater potential for change in our everyday lives. Desire to evolve, overcome our old psychological patterns, being able to see them within ourselves much more clearly without shame or dismissing them. It is a strong urge for personal transparency and desiring to better ourselves.**
- **A greater desire to join friendships, embrace tolerance and forgiveness, greater momentum of love and acceptance but combined with stronger personal needs and boundaries as to what we can actually handle, take on or endure, realistically. It is a balance achieved where we are more aware of a desire to be responsible for our lives, our energy we have each day. To become more aware of our ability as to what we can truly handle in order to maintain our own personal stability and mastery. Balancing karma with the Violet Fire to remove and erase what ever karma we are able to transmute to free up our lives from entanglements with harsh situations, remove them and free ourselves up for true purpose and relationships at a higher level.**
- **Intolerance for insanity, cruelty, using humanity for personal greed and unthinkable purposes among those who are the lowest forms living upon earth. More and more truth emerging as to the corruptions occurring to humanity which prior have been hidden. Now all things pertaining to inhumanity will come out in tidal waves to be undone and brought to an end....this is because Aquarius is all about the divine rights of every human being living in freedom and happiness to reach their full potential – Pluto in Aquarius will be the driving force to pull out from the most psychopathic evil of the underground, all perversions of these activities degrading human life.**

The counterpoint of these activities will be the darker forces stepping up their grip upon suppression and perpetuating greater forms of tech to control humanity in every possible way, mainly through technology tracking inside our bodies and out – to turn our world into their human/mechanical servants, literally a Matrix concept. There is an old myth or belief that the agenda was to mechanize humanity so that other dimensional beings like an AI form of Archons or Watchers, can then enter into human bodies devoid of a soul and a heart flame, and come alive in this dimension to live out its own crazy sense of purpose, which of course, will never happen. Methodically using transhumanism to alter the state of a pure human connected to its soul and higher Presence via Chakras and its endocrine system, firmly anchored in its own body would be the advanced technology used to achieve this goal. We have to watch this push to turn people into machines in various ways and fight for humanity remaining pure and unaltered.

We are in the big war, which is a spiritual war, but the key to Pluto in Aquarius, and the Aquarian Age, is to protect your own life, dream, force field and alchemy, try to remove yourself from the negative disruptions enough in your days so you can bring into your world the beauty and productivity, the hope you can reach your goals or family achievements. Maintain your culture, your love and what makes you feel safe and happy.

Try to give affirmations and pour energy into helping others when it feels right – give of yourselves to

charities, state your truth and take action when you can on the things which contribute to community betterment in any way, as this will be the universal Aquarian community bonding to make our world a better place. We must honor and protect the beauty of being human in the process of becoming Divine. What does it mean to be a pure human being?

By increasing the numbers on our planet which are focusing upon these drives towards freedom, independence and advancement, while nurturing the Love, and the potential of human being, this will override by numbers the anti-humanity perversion of the Aquarian Age. It will be an avalanche of

revolutionary divine humanity moving forward in every way of self sufficiency and advanced lifestyles while honoring organic human potential. We are a wonder, and those who do not possess this magical vessel and potential to be a powerhouse of co-creating with eternity, lust after it, want it yet upon entering in and mutating it, ruin it as they can't achieve it. It is like a malformed fumbling to imitate the creator yet such damage occurs in its Frankenstein creating. Which ever way it works for the individuals or families, using love and humane rights as the foundation is key.

If you want to take it a step further, here is a video which can provide an example of the Person who ascended to the higher realms who worked tirelessly for humanity [LINK](#) and has become the Master of the Aquarian Age – He has all the heart, the sacrifice and the love for humanity to be honored with this great mantle, just as Jesus was the Master of the Piscean Age from the last 2100 years. To study his life would be a great example as to how this new Age's Ideal developments will unfold. (at the end of this Video, I can not verify the economic ideas presented. I also feel the producer of this video was on the right track with most of this video, his heart was in the right place, and this was one of his very first videos. I don't follow this channel with the rest of his videos as they veered off into other subjects not in line with my views.)

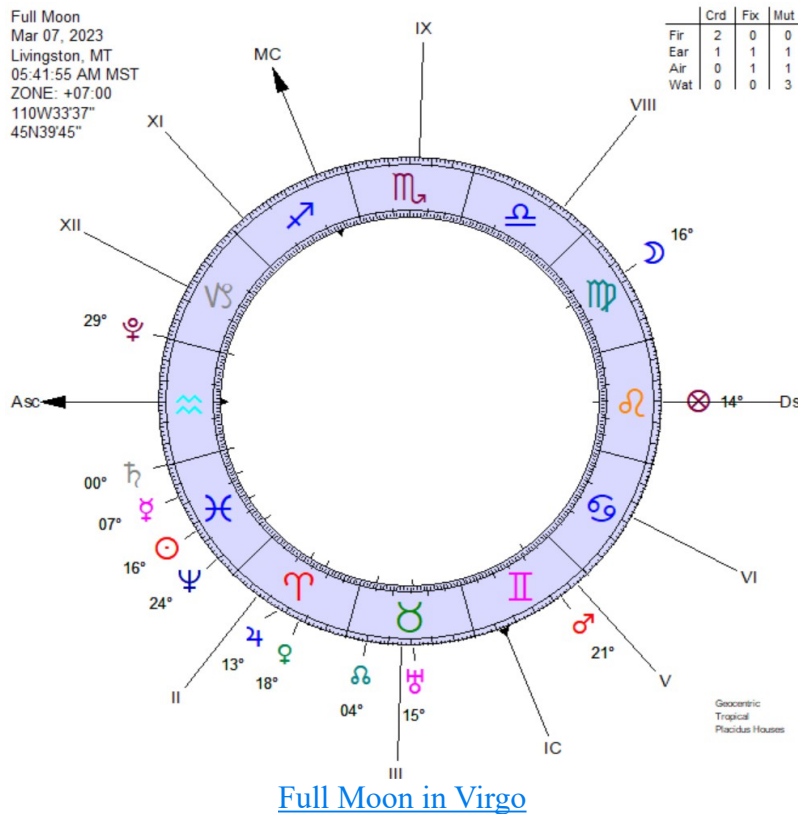

Now we are shifting into a new age, we are practicing our ability to evolve within our own power connected to our Higher Self. but we need that co – creating relationship with God, our higher source in order to bring down into our world a higher blueprint IT holds for us that we may not completely see or be aware of....so becoming connected to our union and co – creating power with God and our Higher Presence is the key to self mastery. For 2100 years – Pluto in Aquarius will be the opportunity for all of us to make great strides to set an example during this time.

May I also suggest an incredible book written in the 60's, Alchemy, by Saint Germain.

[Link](#)

It has been on my bedside since 1979. It is dog eared, bookmarked, underlined and heavily worn, it will always be my go to book for many reasons. I personally have used this book along with Volume I, II and III of the I AM Series of books, the Magic Presence, Unveiled Mysteries and the I AM Discourses.

I rarely share my personal journeys with my audience, but I find this cycle we are entering into so crucial for the highest possible truths followed if one is interested, I must share. These are my beliefs, I completely respect your own paths as this is what Aquarius is all about, right? I love you all.

Coming up on March 7, reaching the fullness of yearning for something better, a greater clarity and solution with whatever has been burdening you, should be clearing up throughout this week up to the 7th. With Virgo exactness of details, and the strategy now in hand in order to plan and move forward, your power should return slightly. Facts and accuracy always helps.

I say slightly because now you have greater logical information you still have to clear away some impatience with roadblocks, limitations and the attitude of injustice or impatience for some, as Mars in Gemini squares the Full Moon in Virgo and square the Sun in Pisces.

This is a t-square and adds an element of a roadblock or obstacle yet also the way out. How do we overcome the feelings of futility or impatience to get on with progress while we're reaching that full moon in Virgo?

Full Moon in Virgo can emphasize the details before you which need to be worked – whether it is bookkeeping, your job/projects which have been crystal clear as to how it is to be laid out or what is expected from you in order to move forward. It might be your health and medical in your life which are now before you, your project management, cleaning, organizing, or your full complicated schedule. Issues with fatigue, sleep, health, energy or overwhelm continue from the New Moon in Pisces a few weeks ago, but now, we have it laid out as to why it is happening and what is required from us to deal with it and overcome some of the discouraging attitude we've been in.

The Full Moon square Mars adds to our logical strategy as to how to proceed now. Focus on Action through Logical planning, scheduling and even altering our ways of sharing and communication. It involves a release valve to our disappointment and discouragement through talking, writing and sharing our frustrations. It might even require travel and getting away and enjoying music, arts, new scenery or visiting friends. This is key now and many of you have already experienced this as the solution a few days ago already beginning.

The Full Moon in Virgo is a test to not wallow in feelings of over service, overwhelm or inadequacy, not measuring up or feeling not heard, not mattering or feeling like a slave in your situation. Injustices and anxiety must be handled and put to rest. Do it through the Mars in Gemini outlet – laying out facts and revisiting these facts in order to get out of our feelings of frustration or anxiety and do shift your focus to enjoyable activities.

AFFIRMATION

“Divine Source of all Love, release your magnificence into all human activities now. Release the solutions, the peace and divine strategy lifting my mind up into a higher level of action, soaring above the limitations of my outer mind. All things in my life are now easy and perfected. A beautiful strategy and understanding is now replacing frustrations and limitations. I Accept this new path laid out before me and all things are now in perfect timing and progress with speed. “

Uranus our planet of innovation, novelty and breaking up stagnate energies trines the Moon and sextiles the Sun. This helps tremendously with making the necessary changes in order to problems resolve problems. You are improving and can handle the future issues with new commitments to yourself. These commitments help you grow and transform a stuck feeling to one of progress and hope. Soon, these problems will pass, and a higher attitude, way of communicating and sharing, a better way will emerge. It also opens up ideas and pathways to help you plan out your projects or issues better without so much tension and rigid thinking.

Again, taking care of money, budget or finances, health medical or body issues like diet or anything else which needs to be addressed. Cleaning organizing or scheduling, efficiency and boundaries with work projects or people, eliminating negative attitudes. Moving towards love and positive solutions rather than working from a place of lack, frustration and limitations are possible with this Full Moon. It is the desire to wrap up bad habits and make peace with this human sense of limitation....maybe even a retreat is necessary in order to break that pattern!

Thank you for your support and have an amazing March!
Christine
