

## A New Atlantis

Stardrops April 13 2025

Can we restore the splendor of our pre-flood civilization once again, and prevent the recurrence of darkness?

Could these past few months' planetary impact on humanity be the start of a time when this could be possible to achieve?

**Venus and Saturn in Pisces' harsh yet encouraging drive to rebuild our lives with higher values. What a great way to start a New Age of humanity.**

April 4-27 The cycle of Saturn, a planet of serious commitments, discipline and testing has been close by Venus our planet of values, our relationship with each other and heart since January 18. Venus retrograde and direct conjoin Saturn in late degrees of Pisces. This has been a familiar energy since late January 2025. It has been part of the large grouping of planets, (Venus, Mercury, Saturn, Neptune and the North Node, and in March 29, the Sun and Moon in a Solar Eclipse) repeating a theme of transformation for the past four months. This is the final moment for this message to reach us, so it could be seen as a completion of Venus' goal for us.

Here are the three strongest dates for this conjunction between Venus and Saturn.

January 18 -21, 2025, February 23 – March 1 2025, April 4-8 and April 20 – 27, 2025

The sign we find Venus and Saturn moving through is Pisces. Pisces is a zodiac sign representing higher lofty emotions, strong idealistic expectations and exalted outcomes. It can

indulge in reflecting on losses, remorse and the attempt to heal, deliver compassion and devote one's life to a mission to cure a problem. It desires to sacrifice and save that which is lost. The key themes we have been challenged to handle, face and replace with healing throughout this five month period might look something like the list below. The problems exposed under this cycle would be any one of a long list of challenges erupting in our own personal lives, or for the planet, and it would be for healing, exposure, and the remedy....remember, many poisons need to dissolve in order to recover our true world.

### The Venus conjoin Saturn in Pisces List of Issues, erupting between February through April 2025.

Reflection on one's life; Surgical processes in order to uncover deceptions, disappearing things, money, people; All issues related to waste, Issues related to suffering, imprisonment, the grooming and using of people, degrading, trickery and programming. The need to let go, surrender an unhealthy thing. Facing illogical irrational individuals with little capacity for truth or reality.

Circumstances surrounding unfortunate and sad activities.. Idealism ("In a perfect world, this is how it should be" and so on....)

The conviction within certain people to sacrifice one's time, money and energy towards fixing and curing the problems. Addictions, sabotaging habits, psychological and entity interference. Biological, health, lymphatic, chemical and toxic poisonous issues, nefarious release of chemicals, Laboratories, testing, universal statistics, reports on viruses, crisis. The sacrificing of people, secret agendas; addictions towards inordinate and disturbing lifestyles. Whistle blowers, leaks, addressing hidden groups and social gateways into secret agendas where the social connections are people who all possess similar peculiar values. Finance, worth of money, worth of goods and the flow of economy, goods and services

All of these Piscean themes have been activated by Mercury, Venus, Saturn, North Node and Neptune in the sign of Pisces since January. And most of all, Pisces is the sign which brings us hope and faith and that includes miracles.

The most predominant theme for Pisces would be the extreme intolerance towards any of the above dysfunctional activities, the determination to uncover them and apply a solution so there might be either healing, isolation, and/or justice or reform. Any activity where one finds the illness so outrageous it must be stopped and contained, put into therapy, examined, and treated, would be a Pisces action.

So the positive outpicturing of the power behind all of this Pisces globally especially activated among a certain population of the people, (and for you and me) would be a strong crystal clear reaction upon anything considered disturbing of a human nature, habitually sabotaging our end goal, and degenerative.

The strong desire to stop it, change it, reverse and discontinue, even to the point of BREAKING THE ADDICTION TO OUR OLD SELF would be top priority on our minds from end of January through May 2025. You might even find yourself at maximum frustration over certain things this April, wanting to get to the root of it.

These triggers of intolerance have only been growing and becoming more clear for us as subversive and sabotaging activities emerge from the depths of the Piscean waters up to the

surface of an ocean of murkiness.. Consider these toxic sabotaging things as carry overs from many years of hidden tangled connections globally.

**But because Pisces is ruled by Neptune, and governs the 12th house of past lifetime lost history, it is challenging our subconscious hypnotic traumas.**

These traumas cover over our cognitive ability with memory wiping phenomena. The ancient records of hardships, changing our history, wiping away or altering and hiding actual artifacts, truth and even documentation, has been similar to someone messing with our heads, causing us to disconnect, question our own common sense. These mysterious events in history result in a sort of Piscean condition of PTSD within humanity, as if we are the ones who require the doctor! The grouping of planets gathered in Pisces/Aries from January 18 through April simultaneous with the end of the Kali Yuga March 30 2025 has been Epic. It has been the moment where finally, the Piscean distortions change into a huge synthesis of global remembrance, launching a humanitarian recovery from our hard journey all these centuries. Many truths have been unveiled during this epic cycle for all to see. The degradation and waste, and the unbelievable and fantastic, even remnants of an Atlantean age.

Are we finally able to deal with this old old momentum buried within most people's subconscious living on this planet at this time? And can we draw down enough quality brilliance to recover the beauty, spiritual morality and technology we once had and more?

## **The Most Supreme and Divine Pisces Role**

The greatest act anyone who is a Pisces, or have many planets in Pisces could do for themselves is to come out of paralysis and suffering. To wake up and shock oneself out of a belief one has no choice but accepting passively one's undesirable situation or condition with no way out, where one finds themselves in a constant state of putting up with a degrading situation for whatever reason, this is the time we're expecting to see above and beyond this condition. Yes, the positive of Pisces would be the savior, the Doctor, the hospital and clinic, the psychiatric remedy, the cure and the medicine – and we, humanity, are now required to find the right way to deal with the oppressive situations. take the cure, not tolerate it.

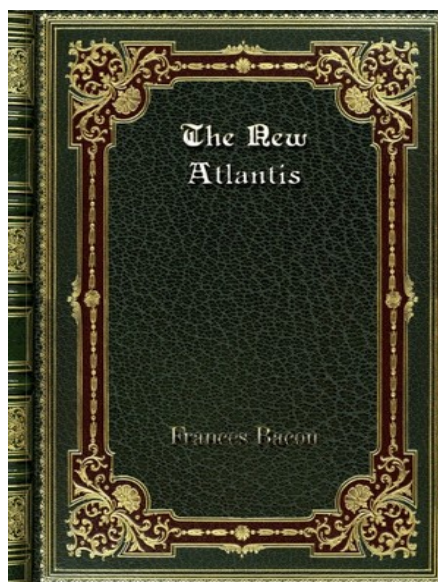

The attempt of thousands of high idealistic types of people holding fast to their sense of mission to handle the patient, to handle an epidemic of corruption has maybe been part of this Piscean idealism. The desire to heal, cure and treat a psychological epidemic(s) which has synthesized into a multi-layered new norm on the planet. Degrading values.

These missionaries are attempting to address what would have been the unthinkable. But now we are all realizing the stark reality of the social aberrations at hand. These are all Venus in Pisces themes – Divine Love, the desire to unconditionally save that which is messed up – or discovering extremely messed up social values, destructive pleasure (Venus) habits and seeking out things which provide soothing etc..but escalate its perversion, until they have lost all sense of morality. But when Saturn sits on Venus, Saturn releases constraint, accountability and definitely, karma. From January through April, returning Karma upon the

perversion of Venus, from the most understandable to the worst and the addiction to darkness.

It's as if Earth has become a complex patient with many layers of disease and an attempt by the willing experts, the ones who have the stamina and vision, are now the Doctor taking on the problem. We are also the Doctor for our own tiresome addiction towards old behaviors.

The highest beauty of Pisces would be Utopia, the dream of heaven on earth.  
The highest art, medicine, science, music, physics, economy that one could imagine. It represents the idealistic way, the highest path worth sacrificing for.  
The Holy Grail. The New Atlantis.

We are all in a recovery in some form or another, and with these several planets in Pisces, especially Venus direct, retrograde, then direct again, from January through April, conjoining Mercury, Neptune, Node and especially Saturn, a new beginning for our lives can occur, even if it appears disheartening. Look and ponder, even in spite of having a difficult journey back to health again, it now can be tackled, and one can recover where as years before this period, you didn't see things the same way and wouldn't have been able to grow as you could now.

It's Saturn impact on the Venus which cements the procedure, forces all to commit to the process.

You can't avoid it, get out of it. It's set to go and bring you to your own new world.

The end of April will be the end of the process – it has been launched, and now after April, we all now are in a different place, with new values, with clearer vision.

We all now have a higher goal to live up to.

For now, we've covered quite enough of this Venus Saturn – and you are most likely absolutely tired of listening to my planetary stellium in Pisces rants for the past several months – I'm just letting you all know, and reminding myself, we are now at the very end of this extreme moment in time, the thrust of this new mission where Earth has been reluctantly dragged under scrutiny, under the microscope, since the beginning of January 18 2025. Everything under the sun which we could speculate has been going on contributing to the disease of humanity has been exposed.

The acceleration and transformation of humanity is truly obvious to behold. But, it's like a terrible diagnosis has been handed to us, and offering a terribly intense protocol for recovery. But what choice do we have. Remember, whether we bring earth into that ideal of a Golden Age again with the souls evolving on Earth, or we lose Earth, yet all move up into that corridor of Light and have our Golden Age in the Etheric Plane, we win. Pisces is considered the end of the line, the last cycle of overcoming death and illusion, and it is no mistake Pisces' Hierarch is the master teacher, Jesus, the Divine Doctor and original High Priest of Atlantis who established the code for humanity so long ago. Can we do this for ourselves, and for the world? I would say, with the help of the Divine, we surely can.

## Other Planetary Cycles

April 10 – 29, 2025. Uranus, our planet of dramatic changes, acceleration, truth and transparency sextiles the Node.

We are in an extremely positive cycle for economic revolution. It might appear crazy and discombobulated, however, a sextile brings opportunity for fixing and transforming economic social trends towards a brighter and more efficient use of money. Uranus brings freedom and liberation. It brings tech and innovation. Sextiles are all about sharing, collaborating and joining together in agreement to move in a particular direction with regards to efficiency and money.

This cycle supports truth and exposure. It brings friendships, agreements. It is a positive humanitarian period for launching something new in your life, a new start, a new business, a new method or technology. It's positive for earning money in a new way. It's good for being befriended and offered advancement in one's life situation or career, and bring a new openness towards a partnership with others. Also, with Uranus, every deception and dysfunction could be finally understood and brought to light.

Now through April 19, Mercury makes its final conjunction to Neptune since the beginning of March 2025. It is now peaking on April 15 – 19.

Mercury impacts our minds, our decisions and all forms of information, reports and facts. But conjoined with Neptune, we're dealing with situations where they might be less than desired, and so what can be offered to us, or presented might be the ideal outcome or course of action in order to reach the best goal. One caution, is that any communication during this period, might not be completely set in concrete, but mutable, fluid and potentially changeable for the future. So, dream big, have faith and plan for the best, but be open to more information coming in the future that you will need.

April 7 – 19 Saturn conjoins Node at 26° Pisces (along with Venus)

It's time to handle money, finances, budgeting and getting incredibly organized. We want to project timelines for accomplishing important tasks. The challenge would be considering social needs, trends and what is popular or what people relate to during this time. IT IS TIME to take your work to the next level of unprecedented impact on others for the good. It is a period to get real with these world issues if you are in a business where it matters. It might be a testy time with people where challenges might come up which requires delicate handling. But I wouldn't back down with your higher inspiring ideas. Push forward.

April 2 – 22 2025 Venus conjoins transiting North Node at 26° Pisces. A period of good fortune and increase of our intuitive natures. Spiritual or self improvement motivation is strong. Peculiar synchronicity happens during these days, so look for unmistakable guidance from higher sources to your own heart as Venus makes this final release of Love into your being. There is a story for you to be understood within this period of time. Venus remembers the whole story. Ask to be taken to a retreat of wonder during sleep at night, and ask for your memory to bring the knowledge back to your outer mind when you awake. There is something important to recall. This has been going on since January 18, 2025 building, yet this period right now, could be when it finally breaks through.

April 8 – 22 Mars in Cancer/Leo trines Node and Neptune

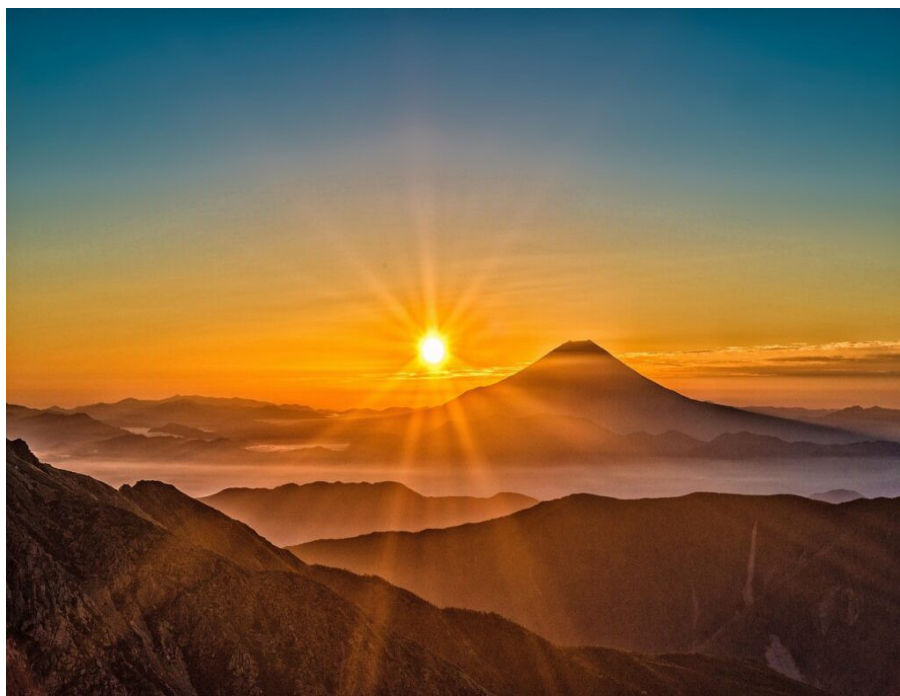

Mars moves forward from Cancer to Leo for the last time on its long journey. This journey of the Mars Retrograde from September 2024 to June 17, 2025 has been constantly bringing us up to the edge of war. During April, it shifts once more April 17 into Leo again, as it continues to follow the Node and Neptune in Pisces/Aries.

Similar to the Venus conjoin Node, the power of Mars in Leo right now, releases confidence, empowerment and fortunate timing for planning all forms of Neptune activities. These activities could be media, video, content and social media. They could involve healing, medical and surgical procedures, This cycle can also increase support and inspiring love and help from others and/or towards others. Compassion, divine love, and a greater energy for expanding one's Highest good feelings out towards the world around you can happen. This Mars is a tuned in connection with the higher realms for guidance, so maybe we should all be communing a bit more during this April in order to experience a recharge of beauty, love and inspiration.

However, Mars' involvement in anything will also motivate action. So during this period, no matter how challenging life might be, Mars trine Neptune and Node can assist us with greater faith, confidence things will work out, we just need to move forward and make something happen!

Along with these several positive aspects we are also entering the final war-like oppositional aggressive energy of the Mars in Leo oppose Pluto in Aquarius, now up through April 30, 2025. This has been increasing and increasing tension and aggressive posturing, internationally, economically, posturing and pronouncing and on and on and on – so it has been an extremely volatile and confusing stressful time in one way, even though we have also been going through the most Epic Transformational planetary period we have had in a very very long time.

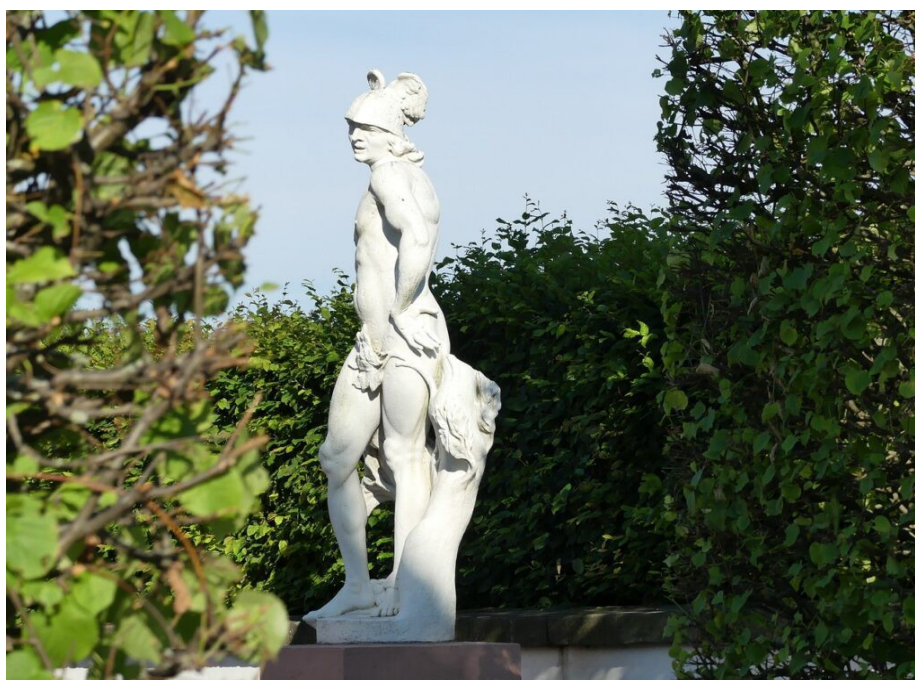

March 22 – April 25 Saturn in Pisces at 23 – 27\* sextile Uranus at 23 – 26\* Taurus.  
We are experiencing a very specific action to help us establish concrete upgraded methods of operations. These upgrades will be occurring everywhere there is technology. It establishes new systems, protocol and higher forms of efficiency. It will be the next new permanent system.

It shares relationship between independent sources, shared by independent satellites and unique departments, agents or individuals who require higher forms of communication, travel and use of application of specific technologies for advanced purposes.

For us, the regular people, it simply assists us with accurate insights, higher levels of friendships, meetings, implementing a new plan, a new way of discipline towards refreshing our lives. It brings us inspiration to establish new routines and new commitments to possibly others for future plans, exciting adventures, work or projects. It's an exciting period where much can get done, and at least, planned.

### **Full Moon at 23\* Libra April 12 and the New Moon in Taurus April 27.**

The Full Moon which occurred on April 12 building from April 8 on...and lasts for about one week after, caused a conflict, an emotional issue which might have been building for a few weeks and came to a head. Mars in Cancer square the Moon in Libra and the Sun in Aries, compelling us to come to an awareness that certain situations we may have before us, are just too much to take on. We might have felt in conflict, and it seemed to be about our work or family relationships. Compromise, letting things go, versus facing the reality of the situation and being objective and realistic with these people. It's a test of composure, realistic planning and maybe even picking your battles. Is the effort worth it? Because Mars' trines to Saturn, Venus, the Node and Neptune, trust, faith for our future, and faith in the best outcome for

ourselves would be crucial to hold onto during this period. Maintaining a vision of the bigger picture might put things in perspective. Also, giving ourselves a break, as we have all been through so much. We are definitely living in unprecedented times of stress and so much against us for so many years. Look at this Full Moon culmination as a moment in time to reflect on what we have emotionally endured up to this point, and so it's no wonder we have received some hard hits.

The New Moon at 7° Taurus also square to Mars, but this time at 4° Leo. Here we have a new start, the launching of an industrious period from April 27 up to mid May to build or construct a plan, a course of action which will empower us. Yet again, because of another square to Mars, a new sort of conflict might arise. Focus on the vision of your quality of life and trusting yourself, your independent confidence with a plan, rather than any conflicts Mars square might bring. We're going to work very hard and become quite focused upon empowerment and constructive, functional plans. With this approach, we can achieve breakthrough!

Thank you for your presence and support! Have an amazing cycle ahead, Lots of Love,  
Christine
