

Excerpt for Stardrops July 11 2026

#1. Uranus in Gemini sextile Neptune in Aries 2025 – 2028

July 15, 2026

Began late June/July 2025 slightly, returns strong and peaks on July 15, begins leaving July 30, 2026.

Returns January 2027, exact January 15; Returns May 20-June 15, exact June 6, 2027; Slightly returns February 2028.

The sextile to Neptune elevates advanced information for openly releasing this technology. This includes the plus's and negatives of AI, Data centers, time travel, rapid movement between to locations, military tech which would blow your mind and the utilization of bending time/space, teleportation and the extreme study of consciousness for particular purposes.

Uranus is not only in a sextile to Neptune, making these activities usable for humanity, but it enhances ideal lifestyle upgrades as a trend, with all forms of communication, data, innovation...and revolutionary thinking, and we can't forget, it intensely causes a greater longing for more freedom and liberation from mundane things, restrictions and limitations, governments, societies, financial, and many others. This aspect also enhances the acceptance of a spiritual consciousness/soul sensitivity, the awareness of our spiritual quest in life.

Again, this cycle began June 2025, and is very strong this July – peaking 15th and continues to repeat up through May 2028.

The last time this aspect occurred in Gemini/Aries, just like now, was 1509 – 1512.

#2 Uranus trine Pluto

Uranus Trine Pluto July 14, 2025 – April 2029 yet is making its first exact peak on this **July 17, through July 30, 2026.** this would be considered, exact peak

Exact Dates:

Slightly experienced, July – October 2025;

Returns July 1 – 25, exact July 17, strongest date;

Returns November 15 – December 10, 2026, exact November 29, 2026

Returns June 10-25, 2027, exact June 15, 2027

Returns April 20 – May 15, exact May 9, 2028.

So what can we expect on all these dates above? Greater cooperation, advancement in technology, breakthroughs and increase of cosmic awareness within our own minds' capacity to elevate ourselves beyond what we have been able to do in the past. Don't ask me how, I just know it's happening!! How can planets impact us like this so much?

So now we have reached July, and this is the three major aspect integrating in this grand array of major planetary movements....

It launches a permanent change in our way of life, pushing us into a warp speed power into Sci – fi world, right now for the next three years.

When Pluto is involved in an aspect like a trine, it adds powerful intent, will and determination to accomplish Uranian unconventional activities and creations...as Pluto is in that radical Sign Aquarius, it enhances the unthinkable. And again, many of these creations and activities have already been underground in operation, however, because of the emerging of these aspects, it's now all being brought out into the open – Many times, a Uranus trine will begin exposing what has been terribly wrong with our own personal situations, and also in the world not acknowledged before.

It is building a momentum of positive liberating opportunities and events nationally, and globally.

Uranus and Pluto both are also activating the U.S. Natal 10th house, midheaven which represents our government, the president and positions of ultimate authority – it represents the area in the chart where things can actually manifest materialize as new blueprints, structures and systems – With Uranus trine exactly transiting Pluto in Aquarius, a relentless drive towards greater freedom not only because it's in the sign of Aquarius, but because it is pouring energy into Uranus the planet of change, sitting on the U.S. Power line of the country's position of interfacing with the entire world, and its own desire to transform the country on every level..–

The conjunction from Uranus in Gemini on the U.S. Midheaven (power over the entire Nation, able to finally transform the country in a big way) this hasn't occurred since the late 1700's.

It is the strongest June 28 2026 and lasts up through April 2029, approximately.

The Date Pluto alone, trines the U.S. Midheaven exact is April – June 2025 lasting up through December 2026. This is once in 248 years in the sign of Aquarius, trine the U.S. Midheaven. I know all this might sound like Greek to you, but it's absolutely incredibly strong to either raise up the United States towards true transformative liberation with people, government transparency, honesty, technology, energy, medicine, etc..etc...or change it drastically towards greater disruption and uncertainty.

As this positive powerful Uranus/Pluto event begins, for all of us personally, it opens the door for being cut free from oppression, manipulation and especially since Uranus conjoins this U.S. 10th house of power and world influence. ...If nothing else, it instigates an increase of extreme restlessness with the public desiring change and transformation in the way things are going..This represents the beginning of the precipitation of economic shifts ongoing for the next 10 months.

The return of a new asset-based economy" could be highly emphasized now.. and of course, the bringing into the physical, some form of new financial system.

Uranus increases potential for positive spiritual expansion for humanity, and to know the truth of just about anything which has been hidden,

With this last aspect, people will be much more willing to risk security and certainty, in order to transform archaic systems and break free from personal limitations....

The downside would be desiring a universal money system presented as a solution for efficiency etc...instilling AI monitoring of bank accounts along with monitoring our cars, augmented human body, digital ID and so on...the merging of society into a social homogeneous group ruled by digital id and compromising our bodies and genes, erasing what it means to be a pure human, even offering the idea of seeking gurus via AI...giving advice to one's soul evolution, karmic path, cosmic name in the cosmos and more..this is the false hierarchy utilizing these planet's alignments at this time, –so that they can rapidly implement their infiltration into our very psyche and control to dehumanize our planet.

They are banking on utilizing this astrology as portals of opportunity, These perversions are too numerous

to go into here, but it is like one global unit of controllable humans compromised, managed for their own energy purposes and resources. I don't want to go into the medical cloning aberrations side of what could come out of this cycle, unchecked... but I think you get it.

Positively, a different world is emerging, political attitudes and structures. ...Tech, economic, government agencies, new trends in music, art, literature, philosophy, science, healing and educational systems, economic financial means of exchange, and so much more.

And mostly, discovering the higher Truths of what makes our Earth so unique, a literal treasure amongst all the planets in the solar systems....the planets we're discussing here, can enhance love, and re-connect us to the God Source, the I AM during these cycles.

And most of all, it offers revolutionary change....stripping back false history and veils of deceptions and distortions of our past, and any activities which impacted the beliefs of humanity, manipulated the public. It demands transparency with everything, so you could expect public leaders and news, journalists, citizen journalists bringing forth radical information, a greater honesty and surprising transparency over one thing after another under these planetary energies now for the next three years and beyond...replacing the old stories with truth.

There is *no area* where this Uranus in Gemini is not having an unsettling impact.

With these planetary positions, you have a recipe for a greater cosmic consciousness on the planet. It is an unprecedented time for creating an Air + Fire era with rapid acceleration,enthusiasm invention, revolution, ideology, spirituality, communication, and with potential manageable social change.

Because Uranus is in Gemini- the power of our consciousness, our very words we speak will become studied and verified, they are changing reality.... which is a Gemini/Mercury theme...

The daily use of Affirmations is the antidote for the undesirable activities being disclosed byat this time - these issues now are so disturbing, people are feeling powerless to do anything about them.

People are studying online the newly revealed info, what is coming out as expose's- but they have no answers....my guess, is the majority of people are jaded ...that anything will be done about it, but still holding out for those in power, to take care of these social problems emerging.....Think of the most disturbing data being revealed since February 1, 2026, think of it, all you've read and heard on the net, this is what we're talking about...including financial discussions, new economic platforms, political regime changes, AI issues, wars, weaponry, disclosures, of secret aberrant communities and societies in powerful positions doing unthinkable things.....the people need Divine tools and a step up of Prayer and transformative Affirmations, to turn things around.

As people of Light, we have been so blessed by a divine wisdom poured into us, in this life and previous, even preparing us for these times we are now in.

The planet Uranus can cut us free from Plutonian archaic control systems, the old guard, abuses of power and oppression with limiting regimes and the types of evolution which fueled them.

Basically, old ways of governing people not aligned with original freedom intentions, will soon seem ridiculous, archaic, almost comical, as to how leaders could still be believing in thinking they can continue the old ways of control and limitations. This is not going to be going on just in the political corporate power world, but penetrate into every community, professional structure and system.

Individually, it releases the opportunity to change your life circumstances for the better...to miraculously break free from old states of mind, oppression and stagnation. Again, this cycle began **July/August 2025 – and continues up through 2029.**

The last time Uranus was in Gemini in a trine like this, with Pluto in Aquarius, our revolutionary sign of advancement of society, under Saint Germain, was **1777–1782**

- Pluto in Aquarius: 1777–1798
- Uranus in Gemini: 1774–1782

In these years,....

- American Revolution
- the spread of revolutionary political philosophy
- acceleration in printing, writing, communication, inventions...Travel, science and electricity - literacy, and intellectual expansion.
- It brought challenges to monarchy and centralized power

These planets lined up during the birth of the United States and the early Industrial-Revolution -

and ***AGAIN***, this time period for Uranus in Gemini trine Pluto in Aquarius is being repeated, right now ***through 2029 only this time more compelling and potent than ever before–*** and because of Pluto's cycle, well into 2041. 2041 is how long Pluto will remain in Aquarius anchoring this new way of life.

The reason this cycle we are in now, is stronger, is because Uranus and Pluto were **not lined up in exact aspects to the exact degrees in the late 1777 *as they are today*** – that's what makes the difference!

#3 Neptune in Aries sextiles Pluto in Aquarius

Neptune in Aries sextile Pluto in Aquarius March 31 2025 to February 2032

- **June – September 2025**
- **July 15 – 30, 2026**
- **September 2026 exact September 16;**
- **June/July 2027 exact June 28, 2027**
- **October 2027, exact October 16, 2027**
- **May/June 2028 exact June 8, 2028**
- **May 2029, exact May 22, 2029**
- **November/December 2029, exact November 30, 2029**
- **April/ May 2030, exact May 4, 2030**
- **December/January 2031, exact December 26, 2030**
- **February 2032, exact February 11, 2032 and February 28, 2032. Finished.**

Very active July 15 – 30, exact July 24 2026... This is a powerful moment when Neptune and Pluto are lined up precisely in an exact sextile, which makes the release of their energies, incredibly influential for us, right now through July 2026.

Neptune's recent movement into Aries, is now joining Plutos' recent transit into Aquarius.. Neptune is at 4° Aries, and Pluto's degree is 5° Aquarius. this is brand new beginning for higher idealistic opportunities to be realized.

It creates an idealistic ethereal energy influencing social mindsets and trends and instills a longing for a better world. Aries is fire, and Neptune in Aries desires to launch and believe in a direct ideal view of how life and situations should be and expect immediate action taken to make it real in the physical now.

Aries doesn't have much patience...both Saturn and Neptune in Aries is quite impatient for crystallizing a new world....Because Pluto is in a 60 degree angle called a sextile aspect to Neptune this leads to a stronger trend for desiring change, enlightenment, peace and cooperation socially and in political leadership, government, agencies, and social movements....

The negative side would be going too far with the people's desire for peace at any price, fall prey to deceptions, and adopt a pseudo easier life as solutions to crisis.... and those in power engaging in more deceptive action in order to sway people into a false Utopian solution for the numerous problems happening in the world.

The influence of Neptune in the sign of Aries, is ongoing up to **March 2039 and the power of the sextile aspect which is** very intense beginning **July 20-30 2026**, actually we're it experiencing right now, does continue to return repeatedly up through **March 3033....**

1536–1539 was the last time....Neptune was in Aries just like now, in a sextile to Pluto in Aquarius, as it is now... and before that, 1044 – 1041.

#4 Jupiter Transit

In addition to these planetary alignments, we add Jupiter which just moved to 0 – 6° Leo June 29th, for the 1st time in 12 years, and you guessed it!

It also is lining up exact with Pluto, Uranus, Mars, and Neptune !

Jupiter supports confidence, positive leadership, and desire to nurture one's creative side.

It is sextile transiting Uranus on July 18-23 ...peaking exact July 21, trine transiting Neptune July 18 -22, peaking exact July 20, and oppose transiting Pluto on July 20.

These additional energies from Jupiter, enhance expansion, success, harmony, healing, increase tangible results occurring with our efforts to accomplish certain things, increase our understanding, determination and also even our capacity to know how to master certain things...basically, helps with our positive attitudes and hope.

The opposition of Jupiter to Pluto is the only testy part of July – causing polarizing sides, judgmental

pressure in a cultural conflict, religious crisis, and expecting cultural challenge. It could also denote, a famous person is either exiting public life, or running into a strong opposition which would instigate a choice to leave, exit, or move on.

These are the amazing Epic July cycles, and as you can see, they continue for months, and some, for years!
